Andres Cabrera

Biography
Andres Cabrera studied statistics and now trains health professionals at the Andalusian School of Public Health in Granada, Spain. He worked mainly in developing, managing and analyzing health surveys of the general population, hospitals and schools. Recently he has worked in the amazing world of knowledge management and information technologies; first in the Andalusian Childhood Observatory and now in OPIMEC, the Spanish acronym for the Observatory of Innovative Practices for Complex Chronic Disease Management. He has a recent publication that utilized 2.0 Web tools and the OPIMEC Community. It is the collaborative edition of a book called 'when people live with multiple chronic diseases: a collaborative approach to an emerging global challenge’. He hopes and believes that OPIMEC, through examples like the previously mentioned publication, will help to improve the quality of care of people with multiple chronic diseases.
